Student Data Privacy and Safety Guide

01

What is AMPD?

02

Why do student athletes use
AMPD on their personal device?

03

Does AMPD track student
location or device activity?

04

How does AMPD protect the
safety of student data?

A few questions, answered.

For superintendents, athletic directors, parents, and anyone curious about what AMPD™ does and doesn't do with student data.

What is AMPD?

AMPD is an athletic-program operating system built specifically for high school athletic departments. Coaches, athletic directors, athletic trainers, and counselors use AMPD to run daily readiness check-ins, share workouts and mental-performance content, manage practice and game schedules, and stay in touch with athletes and parents. Athletes use AMPD to log a 15-second daily check-in, see what's on their schedule, and engage with coach-shared content.

Why do student athletes download AMPD on their personal device?

AMPD lives where students already are: on the phone in their pocket. The daily check-in takes under 15 seconds, schedule changes show up in real time, and coach announcements arrive without checking a separate app or email. Carrying AMPD on a personal device means an athlete can check in from the locker room, update their availability on the bus ride home, or read their coach's pregame mindset note the night before a game.

Does AMPD track location or device activity?

No. AMPD does not request or collect device location, browsing history, contacts, photo library, microphone, or calendar access. The mobile app requests only the permissions it needs to function: push notifications for coach announcements and check-in reminders, and optional Face ID or fingerprint for faster sign-in. Biometric data never leaves the device.

How AMPD™ protects student data.

Four pillars: what we collect, where it lives, who can see it, and how we keep the community safe.

Collection, Use, and Disclosure

AMPD only collects the information needed to run an athletic program. We do not sell student data, we do not advertise to students, and we do not share student information with anyone outside the school district except for the named subprocessors that operate the platform on our behalf.

Data Hosting and Storage

Student data is hosted in the United States on MongoDB Atlas, with the application served by Vercel (United States). All replication and backup remains inside the U.S. Data is encrypted in transit (TLS 1.2 and above) and at rest (AES-256).

What AMPD Does Not Store

AMPD does not store letter grades, GPA, or transcripts. We do not store athletic-training records, injury history, return-to-play notes, or concussion data. We do not store mental-health diagnoses or counseling notes. We do not store IEPs, 504 plans, or disciplinary records.

Zero Advertising

AMPD does not advertise to students. Student data is never used to target or direct advertising in any way, ever.

Content Safety and Moderation

A three-step approach to keeping AMPD safe.

Real-Name Policy. AMPD has no anonymous accounts. Every athlete, coach, and staff member is invited by their school and signs in as themselves. Knowing every poster is a known member of the school community removes most of the conditions that make platforms unsafe for students.

User Reporting. Any user can report inappropriate content directly inside the app. Reports surface immediately to the athletic director and head coach for the relevant team for review and action.

Admin Delete and Audit. Athletic directors and head coaches can remove any post, message, or comment in real time. Every administrative action is recorded in an organization activity log so the district has an auditable trail of moderation decisions.

SECTION 2

For District IT & Security Teams

The pages that follow are written for the people responsible for vendor review, network configuration, and student data privacy compliance at the district level. Hosting, encryption, authentication, network requirements, data inventory, subprocessors, audit posture, and compliance basis. All claims are verifiable in our published Privacy Policy and our IL-NDPA Exhibit E, both available on request.

Everything your network admin needs to clear AMPD™ for your district.

PROVIDER & SURFACES

PROVIDER	AMPD Technologies LLC · 1229 E Algonquin Road, Suite G, Arlington Heights, IL 60005
WEB PORTAL	<code>app.liveampd.com</code>
API	<code>api.liveampd.com</code>
MARKETING SITE	<code>liveampd.com</code>
IOS APP	App Store ID <code>6761788778</code> · bundle <code>com.ampdtechnologies.ampd</code>
ANDROID APP	Package <code>com.ampdtechnologies.ampd</code>

HOSTING & ENCRYPTION

APPLICATION HOSTING	Vercel (United States only)
DATABASE	MongoDB Atlas (United States only, no offshore replication)
ENCRYPTION IN TRANSIT	TLS 1.2+ on all client-server traffic
ENCRYPTION AT REST	AES-256 (Atlas default) · AES-256-CBC field-level on SIS API credentials
DATA RESIDENCY	United States only across all subprocessors

AUTHENTICATION & IDENTITY

DEFAULT SIGN-IN	Email + password (bcrypt-hashed). Session cookie <code>ampd.sid</code> : HTTP-only, secure, SameSite
OPTIONAL SSO	ClassLink (OAuth 2.0 / OIDC). Athletes only. Coaches, ADs, staff, and parents continue to use password sign-in
ACCOUNT SCOPING	All access is server-enforced by organization slug. Cross-organization access is impossible by design
ROLES	Athletic Director, Head Coach, Staff (assistant coach, S&C, athletic trainer, counselor), Athlete, Parent, IT admin
PROVISIONING	Invite-based by athletic director or head coach, or via ClassLink roster sync if enabled

Data Inventory & Subprocessors.

What we collect, what we never collect, and the named third parties that process AMPD™ data on our behalf.

DATA INVENTORY

STORED

- Name, email, role (athlete, coach, AD, parent, IT admin)
- Sport, team, group assignment
- Daily readiness scores (Energy, Stress, Soreness, Focus, Confidence, Mood; 1–5 scale; 90-day TTL)
- Coach-created content (workouts, mindset, announcements, polls; 90-day TTL)
- In-app messages and group chats (90-day TTL)
- Profile photo (optional)
- Eligible / ineligible status (boolean only, not the underlying grades)

NEVER STORED

- Letter grades, GPA, transcripts, class schedules (*live-fetched from SIS only when Academics is enabled*)
- Athletic-training records, injury history, return-to-play notes, concussion data
- Mental-health diagnoses, counseling notes, treatment records
- IEPs, 504 plans, disciplinary records
- SSN, home address, financial information
- Precise device geolocation
- Birthdate or age

SUBPROCESSORS (9 NAMED, ALL U.S.)

DATABASE	MongoDB Atlas
APPLICATION HOSTING	Vercel
TRANSACTIONAL EMAIL	Postmark
FILE / IMAGE STORAGE	Cloudinary
AI GENERATION	Anthropic (no PII sent in prompts)
BILLING	Stripe (no student data)
MOBILE PUSH DELIVERY	Apple Push Notification Service · Google Firebase Cloud Messaging
SSO / SIS BRIDGE	ClassLink (only when school enables Academics)

Audit, Retention & Compliance.

How access is logged, how long data lives, and the legal basis we comply under.

AUDIT, RETENTION & BREACH RESPONSE

VENDOR SUPPORT ACCESS	AD-controlled toggle on each district. Web-portal-only sessions. Persistent banner visible to support engineer. Every action captured in a separate <code>ImpersonationLog</code> with admin email, target user, timestamp, IP, and request path. Available on request
ORG ACTIVITY LOG	Coach and admin actions (invite, remove, edit, delete) recorded in <code>OrgActivityLog</code> . First-class admin UI for browsing the log is on the v1.1 roadmap; one-time export available on request today
CONTENT REPORTING	User-initiated content reports stored in <code>ContentReport</code> with reporter, target, reason, and outcome
RETENTION	Daily check-ins, messages, and content: 90 days · Push notification logs: 30 days · Archived athletes: 365 days then permanent purge
BREACH NOTIFICATION	Within 30 days of confirmed breach to district's named contact, per Illinois SOPPA
DATA DELETION ON REQUEST	Within 30 days · Certificate of Destruction provided to the district

COMPLIANCE POSTURE

FERPA	Compliant School official with legitimate educational interest under district direction
COPPA	Compliant Accounts created via the school, not directly by minors. School-consent model applies
ILLINOIS SOPPA	Compliant 30-day breach SLA, parent inspection process, no advertising, no targeted profiling, no sale of student data
SDPC IL-NDPA V1.0A	Available on request AMPD-side pre-filled, Exhibit E pre-signed
VPAT · WCAG 2.1 AA	In progress Self-attested Accessibility Conformance Report available on request
